Marlborough, New Zealand

Ward Valley is situated at the southern frontier of Marlborough, making it a special place within a special place. The vineyards combination of high altitude, dry air, temperature extremes and deep clay creates a marginal climate and terroir that produces wines of rare complexity. The founders of Ward Valley, James Leary and Freddy Davison have worked tirelessly with their winemaker, to create a range of wines that truly embody the earth that it is made from and the hands that it is made by.
